

GK10 GK10-2

The GK10 is the largest of the Shoprider portable mobility scooters. This is a scooter that is suited to a person that wants all the autonomy and comfort of a full sized scooter but requires the convenience of an easily detachable one.

This scooter is equipped with 36 amp batteries that can be charged on the scooter or the battery pack can be removed and charged separately while the scooter remains in storage. The GK10 detachable scooter separates into four modules that will easily fit into the trunk of a car so the machine is transportable. The heaviest module is only 21 kilograms.
